

Delivering breakthrough UAS technology, today and tomorrow.

WASP

One Pound - One Person - Multiple Missions. A hand-launched micro air vehicle designed for front-line day/night reconnaissance, surveillance and targeting missions. Wasp is the standard MAV for the USAF BATMAV program.

GLOBAL OBSERVER

A long-duration UAS designed to loiter up to a week in the stratosphere providing persistent ISR, communication and data relay over expansive areas. Initial aircraft in development under a U.S. DoD joint capabilities technology demonstration program.

RAVEN

The RQ-11B is the small UAS standard for the US Army, US Marine Corps, USSOCOM, and the choice of US allies. Organic day/night reconnaissance, surveillance, and target acquisition in a small, hand-launchable package for dismounted troops.
