

**MAYBE SOMEDAY. POSSIBLY ONE DAY.
DEFINITELY THIS YEAR.**

Pratt & Whitney Canada's PW308 turbofan engine is going to space in 2008. It's poised to power WhiteKnightTwo, the mother ship that will launch the first commercial passenger spaceship ever. This innovation alone makes the dream of space travel real for aspiring astronauts around the world. **Their dreams depend on this mission. And this mission depends on our innovation.**

**DEPENDABLE
INNOVATION**
