

# persistent awareness.

**persistent awareness.**

Remotely operated aircraft systems produced by General Atomics Aeronautical Systems are routinely operated over world trouble spots. With the precision capability to detect, identify, track, and even strike time-sensitive targets instantly, Predator and Predator B fly missions beyond the capabilities of manned aircraft.

The multi-mission Predator B/MQ-9 Reaper can be configured to meet any mission. Equipped with electro-optical/infrared (EO/IR) streaming day and night video, Lynx Synthetic Aperture Radar (SAR) and weapons, Predator B provides unparalleled support to ground forces. This same aircraft equipped with the EO/IR system and a multi-mode maritime radar provides unmatched maritime surveillance.

A cost-effective force multiplier in every sense. Not only operational, but indispensable.
