

# Not Just a Piece of the Puzzle

## A Complete, Autonomous Surveillance Solution

### It's All in VistaNav® SSR

#### **Comprehensive**

The VistaNav SSR (Smart Surveillance and Reconnaissance) system encompasses a tactical-class UAV, airborne sensor integration, Synthetic Vision flight-control software, and a range of ground control stations.

#### **Revolutionary**

The combination of Synthetic Vision mission control and onboard integrated image processing sets VistaNav apart, providing unprecedented levels of situational awareness, real-time intelligent image processing, and autonomous UAV operation.

#### **Versatile**

Ideal for many remote sensing applications: pipeline surveillance, forest fire monitoring, homeland security, asset protection, remote inspections, and more.

#### **Affordable**

The power of traditional, large-platform systems at a fraction of the price.

For more information on VistaNav SSR, call (866) 627-1671 or visit [www.mc.com/ssr](http://www.mc.com/ssr)
