

LOOKING GOOD.

Unmanned aircraft from AAI are "looking good."

U.S. Army Shadow® 200 systems protect warfighters in Iraq and Afghanistan with integrated situational awareness data. Next-generation micro air vehicles* "hover and stare." Our Aerosonde® aircraft perform amazing long-endurance military and civil missions.

On the ground, One System® advanced ground control stations and other network technologies from AAI manage multiple unmanned aircraft systems, including the Army's new Sky Warrior extended-range/multi-purpose aircraft systems.*
